

Kopfrechenübungen für jeden Tag

(Lösung)

gemischte Aufgaben 1

Löse die Aufgaben!

$72 : 4 = 18$	$5\,600 : 8 = 700$
$3^2 = 9$	$93 : 3 = 31$
$1200 \cdot 4 = 4\,800$	$34\text{ m in cm} = 3\,400$
$ -13 = 13$	$345 + 235 = 580$
$\frac{1}{2}$ von 100 = 50	$500 \cdot 8 = 4\,000$
$100 \cdot 14 = 1\,400$	$112 : 8 = 14$
$12\,000\,000 + 200\,000 =$ $12\,200\,000$	$42\,000 + 30\,000 = 72\,000$
$200 \cdot 4 = 800$	$\frac{1}{4}$ von 100 = 25
$100\,000 - 50\,000 = 50\,000$	$17\,000 - 5\,000 = 12\,000$
$9^2 = 81$	$17 \cdot 17 = 289$
$400 \cdot 6 = 2\,400$	$225 : 15 = 15$
$50\,987\,000 + 32\,000 =$ $51\,019\,000$	$2\,420 + 360 = 2\,780$
$200 \cdot 8 = 1\,600$	$\frac{1}{4}$ von 1000 = 250
$463\,000 - 77\,000 = 386\,000$	$33\,700 - 8\,800 = 24\,900$
$ 987 = 987$	$423 + 77 = 500$
